

Factory reset an ADC-VC826 to its default settings

Resetting a device to its factory default settings removes all of its existing programming and memory. Most devices must be removed from the account and re-enrolled after a factory reset.

Reset procedure	Reset button location	Reset button image
<ol style="list-style-type: none"> 1. Hold the Reset button while reconnecting power. 2. Continue to hold the Reset button for 10 seconds. 3. There is no LED indication that a factory reset has been done, so be generous with time estimates. <p>Important: After performing a factory reset, it is strongly recommended to leave the device alone and plugged into power for two minutes.</p>	<p>The Reset button can be found on the main circuit board.</p>
